INTRODUCTION TO THE ALBUM

Forget everything you thought you knew about live recordings... this is "**Slipknot 9.0: Live**" this is live in the eye of the storm....this is where the myths are made!

In a world where the mentality seems to be "work less, yet earn more," Slipknot have done everything they can,

to work harder and earn what they deserve, to the delight of their fans (known affectionately as the maggots). The latest culmination of their efforts is, "**Slipknot 9.0: Live**", a bludgeoning double-live CD of the past three album's worth of material that captures all of the noise, hatred, intensity, violence, pain, blood and infection that make the maggots swarm.

The 24 recordings on "**9.0: Live**" were made directly from the soundboard in countless cities and capture the immediacy and explosiveness of the Slipknot experience. In March of 2004, they set out to remind the world of what they do best: taking it to the people live - a full-contact concert experience. The album contains gems from the nearly two years of brutal touring the band waded through, rejoicing, suffering, destroying, but most importantly reconnecting as a unit, a family, an unstoppable force that will never be reckoned with, never be duplicated, but always envied.

Now.....here is a record of all they have decimated, all they have obliterated. Their enemies call it a document of the ultimate inhumanity; their fans consider it a gift. Here is..... "**9.0 Live**".....Slipknot's ultimate live document.
